

SAMPRIT CHAUDHURY

Java Backend Developer | Spring Boot · REST APIs · Microservices · PostgreSQL

Kolkata, India | +91 9836363605 | sampritchaudhury@gmail.com

PROFESSIONAL SUMMARY

Salesforce Developer at Cognizant with 3 years of enterprise backend experience, actively transitioning into Java Backend Development. Independently designed, built, and shipped a full-stack Spring Boot application — with Spring Security, JWT authentication, Hibernate/JPA, PostgreSQL, and OpenAI API integration — reaching 1,500+ active users on Google Play. Strong foundation in REST API design, database architecture, and Agile delivery. Targeting Java Backend Developer roles at product and service organizations.

TECHNICAL SKILLS

Backend & Database: Java, Spring Boot, Spring Security, Hibernate/JPA, REST APIs, Microservices, PostgreSQL, SQL, Apex, SOQL

Security & Cloud: JWT, OAuth, RBAC, AWS, Firebase, Git, GitHub, CI/CD, JIRA, Agile/Scrum

AI & Frontend: OpenAI GPT API, Generative AI, LLM Integration, Agentic AI, React Native, React.js, Next.js, TypeScript, JavaScript

PROFESSIONAL EXPERIENCE

SDE 1 — Full Stack Developer | Cognizant

Aug 2023 – Present · Kolkata

- Designed and developed Apex classes, triggers, and asynchronous workflows applying object-oriented principles and Governor Limit-aware architecture to deliver scalable backend solutions for global enterprise clients.
- Engineered and optimized SOQL queries for high-traffic enterprise data operations, applying selective querying and bulk-safe patterns to maintain data integrity and performance at scale.
- Resolved 25+ critical production bugs and delivered core features across Agile sprints — contributing to sprint planning, peer code reviews, and JIRA-tracked milestones; achieved a consistent 5/5 performance rating.
- In parallel, independently designed and built full-stack Java/Spring Boot applications end-to-end. Applying REST API design, JWT security, and relational database architecture.

Java Developer Intern | LTIMindtree

Jan 2023 – Apr 2023 · Remote

- Built Core Java applications using OOP, Collections Framework, Exception Handling, Multithreading, and File Handling per enterprise coding standards.

PROJECTS

ChefBit : AI-Integrated Recipe Application · Java, Spring Boot, Spring Security, Hibernate/JPA, PostgreSQL, JWT, OpenAI API, Firebase, React Native

- Architected & shipped a production Spring Boot REST API for a consumer AI-integrated mobile app, reaching 1,500+ active users on Google Play; secured via JWT, OTP verification, Spring Security filter chain & RBAC.
- Designed a normalized PostgreSQL schema (users, subscriptions, reward system) with optimized queries; integrated the OpenAI GPT API via asynchronous, non-blocking calls for real-time AI content generation.
- Built Firebase Cloud Messaging, Maven-managed CRON jobs, and a React Native front-end consuming all REST APIs; owned UI/UX decisions that contributed to strong user engagement and positive feedback.

TaskFlow : Task Management REST API · Java, Spring Boot, Spring Security, PostgreSQL, Hibernate/JPA, JWT, Maven, REST APIs

Personal task and project tracking tool built to solve the common problem of scattered, unstructured to-do tracking across teams — providing a centralized, secure API for creating, assigning, and tracking tasks with role-based access.

- Building a production-grade Spring Boot REST API from scratch (Java, Spring Security, PostgreSQL, Hibernate/JPA, JWT, Maven) with centralized exception handling and constructor-based dependency injection.
- Structured into multiple RESTful endpoints across task, user, and auth modules following a clean layered architecture (Controller-Service-Repository), designed for maintainability and easy extension.
- Eliminated all hardcoded credentials and implemented a complete JWT-based auth lifecycle (token generation, validation, refresh) with environment-variable configuration — every line self-written, no AI code generation.

EDUCATION

B.E./B.Tech, Information Technology

Future Institute of Engineering and Management | Kolkata | 2019 – 2023 | GPA: 9.25/10 · Rank 1 (Final Sem) · Dept. Rank 5

CERTIFICATIONS & ACHIEVEMENTS

- 7x Salesforce Certified
- Independently shipped a full-stack Java application to Google Play, reaching 1,500+ downloads within the first month, full ownership from backend architecture to deployment
- Perfect 5/5 performance rating at Cognizant across consecutive evaluation cycles
